Dear Ms. Stevens,

As a business leader and a father I want to express my strong opposition to allowing increased levels of pollutants into Lake MI. While I support our need to become energy independent, we cannot do it at the expense of our greatest natural resource. As a business leader, I encourage you not to make a short term decision that will hurt Lake MI in the longer term. As a father, I ask you not take away the safety of being in Lake MI for my children and all those that love the Great Lakes.

What you are considering doing matters and I oppose it!

Thank you for your consideration.

Best Regards,

John Parker
